Regarding Alleged Pi Wallet Freezing, Teltlk International Urges Pi Network

Jakarta, Beritabulukumba.com – Teltlk Internasional confirmed that there was a problem with withdrawing Pi from its Pi wallet, which was previously suspected to have been frozen by the Pi Core Team.

In a statement, Teltlk revealed that there was an issue with their wallet address which prevented withdrawals from being processed.

"There is currently a problem with the wallet address and withdrawals cannot be processed," said a Teltlk representative in the post

This issue was reported to the Pi Core Team (PCT) team on May 23, 2024. PCT stated that they are also not yet sure of the exact problem and are actively investigating it.

Teltlk's global operations team urges the Pi Core Team to immediately resolve this issue to ensure the security of assets on the Pi network. They also asked all Pi Network participants to pay attention to the progress made by PCT in solving this problem.

"We appreciate the support and trust from Teltlk users around the world," the representative added.

In relation to the issue of Pi withdrawals from Teltlk addresses, Teltlk confirmed that all their users' Pi assets are stored on the Pi network with the wallet address  
GBU7PR3VSIWZGQZYOHP6KEUEBJPX4HYN6FMHDB5VQNJ2NNVCWU4D5ANE.

Previously, there was an uproar among Teltlk application users who were unable to make transactions with the Teltlk wallet.
